BZ型变压器轴流泵
BZ TRANSFORMER AXIAL FLOW PUMP

型号说明 Model Directions

□BZ－□ □

- 序号Number
- 口径Caliber
- 变压器轴流泵Transformer axial flow pump
- 电机极数Number of poles

产品概况 Product Overview

BZ型变压器油泵广泛适用于变压器片式散热器上。根据变压器负载的变化，散热器可进行强油循环风冷、自然循环风冷等形式。油泵结构紧凑，体积小，重量轻，使用灵活方便，消耗功率小，运行安全可靠，维修简单，寿命长。是理想的新一代变压器冷却用油泵。

BZ type transformer oil pump be widely used in palte radiator ,according the load of transformer ,the radiator can excute forced oil -circulation and natural circulation . the oil pump with compact structure ,smaller volume ,lighter weight ,easy way to use ,lower consumption,reliable running, easy to fix ,long life cycle,which as a great new generation for transformer oil pump .

使用条件 Use Conditions

海拔高度：不超过2500m	Altitude: less than 2500m
环境温度：-25℃～+50℃	Circumstance temperature:-25℃~+50℃ .
输送液体：变压器油	Transfer medium: transformer oil
工作方式：连续运行。	Working type: Continuous operation type
